Tejasvi Darak

Hyderabad, India
+91-8555840780 tejudarak002@gmail.com linkedin.com/in/tejasvidarak github.com/tejudarak09

Certifications

- **Google Data Analytics Professional Certificate** |*Coursera*
- **AWS Certified Cloud Practitioner** | *Amazon Web Services*
- **Microsoft Azure Fundamentals** |*Microsoft*
- **GitHub Foundations** |*GitHub*

Technical Skills

Programming Languages: Python, SQL, Java
Python Libraries:Pandas, NumPy, Matplotlib, Seaborn
Data Engineering : ETL/ELT, Data Pipelines, Data Cleaning, Data Validation
Big Data & Cloud:Apache Spark (PySpark), Azure Databricks, Microsoft Fabric, AWS (S3)
Databases: MySQL, PostgreSQL
BI & Visualization: Power BI, DAX, Power Query, Tableau, Amazon QuickSight, Excel
Data Concepts: Data Modeling, Data Warehousing, SQL Joins, Aggregations, Data Quality

Projects

E-Commerce End-to-End Data Engineering Pipeline | *Python, SQL, Apache Airflow, PostgreSQL* **February 2023**

- Developed an end-to-end ETL pipeline using Python and SQL to extract, clean, transform, and load e-commerce sales data into PostgreSQL.
- Designed a relational data model with fact and dimension tables to support scalable analytical queries and reporting.
- Automated data workflows using Apache Airflow, implementing task scheduling, dependency management, logging, and error handling.
- Implemented data quality checks, duplicate detection, and incremental data loading to improve data reliability and processing efficiency.

Real-Time Financial Transactions Data Pipeline | *Python, Kafka, PySpark, AWS S3* **September 2023**

- Developed a real-time data streaming pipeline using Python and Apache Kafka to ingest and process financial transaction events.
- Implemented rule-based anomaly detection, data validation, and streaming checkpoints to identify suspicious transaction patterns and improve pipeline reliability.
- Built an AWS S3 data lake using partitioned Parquet files to store processed transactions and support downstream analytics.
- Implemented PySpark Structured Streaming for data transformation, event-time processing, and transaction aggregation.

Retail Business Intelligence & Profitability Analysis | *SQL, Power BI, DAX, Excel* **January 2024**

- Analyzed retail sales data using **SQL queries, joins, aggregations, and CTEs** to identify revenue trends and profitability patterns.
- Developed interactive **Power BI dashboards** to monitor sales performance, profit margins, regional trends, and product-level KPIs.
- Created **DAX measures** for total revenue, total profit, profit margin, and average order value to support business performance analysis.
- Performed **profitability analysis and data-driven business analysis** to identify underperforming products, evaluate discount patterns, and recommend potential improvements.

Customer Retention & Marketing Campaign Analytics | *Python, SQL, Power BI, Pandas* **April 2025**

- Performed **exploratory data analysis (EDA)** using Python and Pandas to identify customer purchasing patterns and data-quality issues.
- Developed SQL queries to analyze **customer lifetime spending, purchase frequency, repeat purchases, and retention metrics**.
- Implemented **RFM customer segmentation and cohort analysis** to evaluate customer behavior and identify retention trends.
- Built interactive **Power BI dashboards** to visualize customer segments, retention rates, purchasing behavior, and marketing campaign performance where campaign data was available.

Education

KL University **Hyderabad, India**
Bachelor of Technology in Computer Science and Engineering - GPA : 8.12 *2022 – 2026*
